1) .AVI format files;
2) .ASF format files;
3) .MPG format files;
4) .RMVB format files;
5) .MOV format files;
6) .VOB format files;
7) .DAT format files;
8) .WMV format files

Software Installation

Automatic Installation

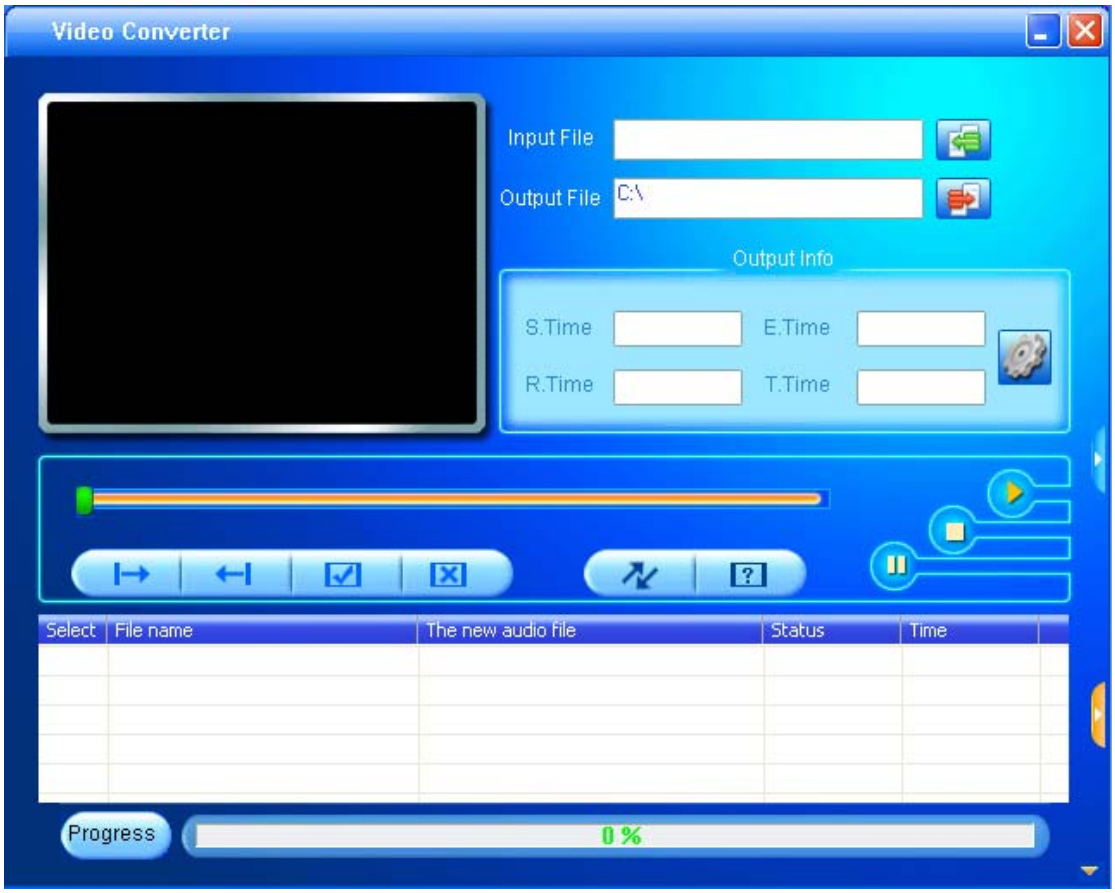
Start PC, enter Windows system, place the tool installation CD into the CD-Rom, and the installation will be automatically run. Please follow instructions to click “next step” button, and click “off” button when installation is completed successfully.

Manual Installation

If automatic run is not set up in the PC, then the installation needs to be started manually:
First, double click the Setup.exe file under the root directory of the CD to start the installation guide; follow instructions to click “next step” button, and click “off” button when installation is completed successfully.

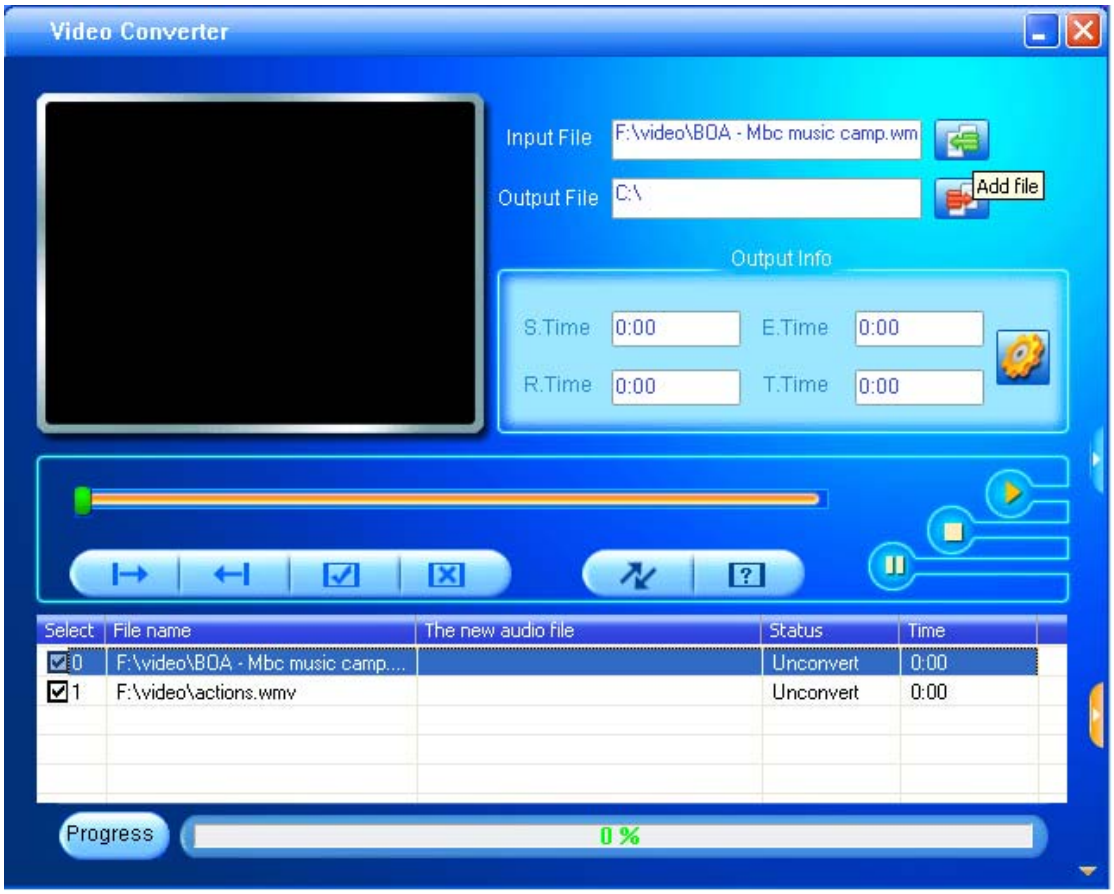
Video File Conversion

1. Running this tool.
Click 【start】button – 【program】menu, select “MP3player management tool” – “video converting tool” to enter the main interface.



2. Adding AV files

Run software, click the “add file” button on the right side of the “input file” column to add AV files to be converted, and a dialogue box will automatically pop out for adding one or more AV files.
After the file is added, the path of the AV file will be displayed in the “input file” field as shown below; and, relevant information of the added file, such as the check box, file name and path, status and file length, will be displayed in the status column.



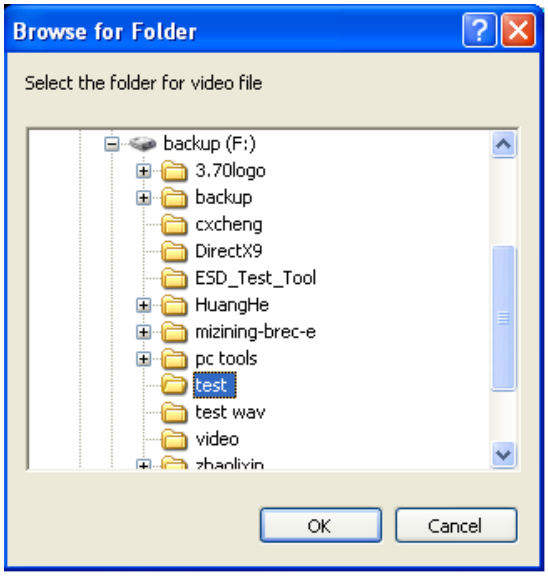
3. File conversion

1) Select the file to be converted

In status column, on the left side of each AV file name, there is a check box and a sequence number. The check box is used to choose a plurality of AV files to be converted, and the newly added AV files are checked as default setting. If a file is not checked, it indicates that this AV file will not be converted. In addition to directly tick the check box, the AV file may also be selected or removed by right clicking the mouse over the file and choosing “select” or “remove” in the pop-out window. To remove any AV file from the adding list, simply right click the mouse over one or more AV files, select “remove”, and the files will be removed from the list.

2) Select the storage path of the video files

This conversion tool uses C:\ as the default path for storage of video files. Before file conversion, click the video storage path button on the right side of the “output file” column to specify the location for saving the video file. When the “browse file folder” dialogue box pops out, select the specified storage path, and then click “confirm” button.



Afterwards, the path in which the video files are stored will be displayed in the "output file" column of the conversion tool interface.

3) Properties setting

Before converting AV files, some important parameters of the video files need to be set, such as the type (AVI or WMV), the intercepted part and the length of the video file, image exchange, image quality. There are two methods to enter the properties setting interface:

A. After selecting one or more AV files, click the settings button in the "output information" column to enter;

B. After selecting one or more AV files, right click the mouse and select "settings" to enter;

"Select" here does not mean checking the AV file in the check box, but using the mouse to click file name to make the file background color blue.

4) Start converting file

Confirm that the check box of the AV file to be converted is checked. Press the conversion button in the tool interface to start, the tool begins to convert all selected AV files of which the check box has been checked, and the file status will be changed from "not processed" into "being converted", and the conversion progress bar will be displayed in the conversion progress column at the same time.

In addition to the above file conversion methods, the AV files stored in the hard disk may also be selected and converted by right clicking the mouse and selecting the "start video conversion" in the pop-out menu, and the tool will automatically run and directly start file conversion.
